QUICK SERVICE + FINE DINING RESTAURANT

INCREASE PRODUCTIVITY

- Customized screens and order flow to streamline efficiency.
- On-screen order panels allow cashiers to view orders for expediting and quickly switch between orders for adding items and payment processing.
- Efficiency timers can be set to report speed of service.
- Automatic combo recognition reduces voids and order re-entry.

IMPROVE ORDER ACCURACY

- (Re)Open Tables displays all details
- Customizable security allows management to control which functions employees are permitted to access.

INCREASE PROFITS

- Ensure that employees charge for add-on items.
- Focus on runners with good profit margins
- Reduce labor costs with enforced schedules and real-time reports.

Reflection POS is the most complete and reliable restaurant management system on the market. Reflection POS adapts to your way of doing business, making it easy for managers and employees to learn and to operate. Reflection POS can handle single-window, dual-window and two-lane drive-thru operations. Orders are routed to kitchen video devices and kitchen printers for food preparation and expediting. Reflection POS enables restauranteurs to provide fast and accurate service, making for an enjoyable dining experience for customers.

NO Windows   **NO Malware**   **NO Headaches**

WHY REFLECTION POS

Reflection POS® is proven software with more than 50,000 systems installed in 35 countries around the world.

Reflection POS® is equipped with the most sophisticated network on the market. System information is automatically replicated on every terminal across the high-speed TCP/IP network. The self-healing network automatically corrects for interruptions and resumes data synchronization without management intervention.

Built on solid-state technology and an embedded operating system, Reflection POS® is not susceptible to viruses or spyware so you can rest assured that it will be ready to perform when you need it.

Why take a chance with anything else!
